ALSO,

**Pamphlets on Gardening.**  
Calculated by the subscriber, to answer for Camden and the adjacent country, near the same latitude.

If the above Seeds are warranted. Should any one find them otherwise, after a fair trial, others will be given in their place.

Nov. 21.

## The Indian's Panacea.

FOR the cure of Rheumatism, Sciatica, or King's Evil, Gout, Sciatica, or Hip-Gout, Incipient Cancer, Salt Rheum, Syphilis and Mercurial disease, particularly Ulcers and painful affections of the bones. Ulcerated Throat and Nostriils, Ulcers of every description, Fever sores and Internal Abscesses, Fistulas, Pilos, Scald-head, Scrofulous Biles, Chronic, Sore Eyes, Eye-rents, Ulcers, Blotches, and every variety of contagious Affection, Chronic Catarrh, Headache, proceeding from an acrid humor; Pain in the Stomach and Dyspepsia, preceding by vomiting; Affections of the Liver, Chronic Inflammation of the Kidneys, and general debility, caused by a torpid action of the vessels of the skin. It is singularly efficacious by removing those constitutions which have been broken down by injurious treatment, or juvenile irregularities. In general terms, it is recommended to all those diseases which arises from insufficiency in the blood, vitiation of the humors, of what ever name or kind.

Some of the above complaints may require some trifling assistant applications, which the circumstances of the case will dictate; but for a general remedy or Purifier, to remove the cause, THE INDIAN'S PANACEA will generally be found sufficient.

## To the Public.

How true it is, that modern Physicians—in their

ability to excel in their profession; to explore the vast fields of Science by the aid of Chemistry, and seek out new remedial agents; in short to arrive at perfection in the practice by means of art alone,—overlook and neglect, or beneath their notice the rich and bountiful stores of medicine, which the almighty has caused to spring out of the earth in every clime! And how much more true it is, that while the American physician looks to foreign countries for many of his most common and necessary articles perpetually changing as they are the dictates of fashion or folly he is introduced in his own country with an endless profusion.

The *compendious, efficacy and safety* of vegetable remedies over mineral, may be estimated by contrasting its ancient practice with the modern, or to bring it more immediately under our own observation, the Indian practice with that of the whites. Who, in America, has not known or heard of repeated instances wherein some decrepit, un-providing Indian by means of her simple remedies alone, has effected the most rapid and astonishing cures, after the whole *Materia Medica* of the common practice, directed in the most skillful manner has failed? And who has not been surprised at beholding the comparative ease and facility with which the Indian frees himself of any disease, and at the almost total absence of chronic disease among them? Who has ever heard of an Indian with a constitution broken and ruined by ill treatment? And can a doubt exist, that this happy exemption of the savage from most of the ills which the flesh of civilized man is heir to, is chiefly owing to the more genial and safe remedies which he employs? This astonishing difference in success, is a fair exemplification of the infinite superiority of this simple and safe means of cure which God has created for the benefit of his children, over those which the pride and the art of man have invented.

From a long residence among a portion of theaborious inhabitants of this country, and an intimate acquaintance with the methods of cures of some of their most successful practitioners, the proprietor of THE INDIAN'S PANACEA, acquired a knowledge of some of their most powerful and favorable remedies. From these he selected such as were most efficacious and appropriate, and after various experiments to test their principles and strength, he has combined them in the form here presented, as the most perfect and beneficial for the purpose for which it is recommended.

The proprietor offers this preparation to the public, with the consciousness that he is placing with in its ranks, a remedy capable of relieving many of his afflicted fellow beings, who are suffering under the various chronic and obstinate complaints to which it is applicable. To such it will prove of incalculable value, as the means, and in many cases the only means of relieving their sufferings and restoring them once more to health and happiness. This is not offered as a common remedy, that may perchance be equally good with many other now in use, but one which is capable of saving life in many extreme cases, when all the usual remedies fail. This it has done repeatedly; and this is the reputation it has obtained wherever it has been introduced.

It is only about three years since this preparation was first presented to the public; but in that short space of time, some hundreds of persons might be found, who would solemnly declare, that they believed that their lives were saved by it, and in most cases, after they had tried many perhaps all the common remedies in vain. Whenever it is known it is rapidly coming into use, and this affords the most substantial and convincing proof of its merits.

The value of the Panacea, is most conspicuous in those long standing and obstinate asphytic and scrophularious affections which have defied all other remedies, and particularly in those cases where mercury has been so lasciviously used as to cause distressing pains in the bones, nodes, aperientic disorders, derangement of the digestive organs, &c. These it completely removes and in all cases entirely eradicates the disease and the effects of mercury, renews the constitution, and leaves the patient sound and well. In Rheumatism, and in ulcerated sore throat, its happy effects are not less apparent, giving almost immediate relief.

Taken in proper doses, THE INDIAN'S PANACEA operates as an alternative, and detergent; a diaphoretic, diuretic and laxative; an antispasmodic and anodyne, and in proper cases, as a stomachic and emmenagogue. Generally expressed, it increases all the secretions and excretions, gives tone to the stomach, and excites action in the glands in a particular manner. From these principles its operation may be understood.

This medicine has been found highly useful in many ambiguous diseases not here specified, and it has been used with wonderful success as a Spring and Fall purifier, by those who are subject to complaints of the chest, and whose constitutions require new vigor. Such persons will do well to use two or three bottles in small doses. Whenever a diet-drink is considered necessary, the Panacea, taken in a small dose, will answer all its purposes, in much less time, at less expense, and in a far more agreeable manner, than the common diet-drink.

The following certificates, out of hundreds similar which might be procured, are given to show the effect of THE INDIAN'S PANACEA, in the various complaints herein mentioned; and also to exhibit in the most satisfactory manner its superiority over the syrup in common use.

## CASES OF RHEUMATISM.

CHARLESTON, Nov. 15, 1831.  
During the last winter and spring, I was afflicted with a very severe and distressing Rheumatism, occasioned by exposure to bad weather. I now take great pleasure in stating, that six bottles of THE INDIAN'S PANACEA, restored me to perfect health, and I confidently recommend it to all similarly afflicted.

JOHN FERGUSON, King-st.

CHARLESTON, March 27, 1832.

I was seized about three years since with a distressing Rheumatism caused by taking a severe cold while under the influence of mercury, and which has disabled me from business nearly ever since. During this period I have been a patient in the Marine Hospital in this City, upwards of four months nearly, and the same length of time in the Baltimore Hospital, and tried almost every remedy, with little benefit. On the 10th of February 1830 at that time scarcely able to move about upon crutches, I commenced the use of THE INDIAN'S PANACEA. In one month I found myself entirely cured from the pain, and am now happy to state that I feel myself perfectly well.

A. D. JOHNSON.

Lancaster March 12-7-3m

The Charleston Mercury, Columbia Telescope, Cheraw Gazette, and Charlotte Journal will publish the above four times and send their accounts to this office for payment.

## DYSPEPSIA

S. N. B.

### LIVER COMPLAINTS.

DR. PETERS' VEGETABLE MEDICINE STOMACHIC ET HEPATIC, formed by chemical analysis and synthesis of several proprieetary vegetable principles, are universally acknowledged to have totally eclipsed the pretensions of every other remedy, and superseded the necessity of every other mode of treatment, whenever the above disease are found to exist as well as in the enlargement of the spleen and

the glands.

Among the symptoms of Dyspepsia and Liver-complaints, are flatulence, sourness or burning in the stomach melancholy, irascibility, disagreeable taste in the mouth; great irregularity of appetite, which is sometimes voracious, and at other times greatly deficient, thirst, fetid breath, nausea, weakness of the stomach, and eructations, palpitation, drowsiness, irregularity of the bowels, pressure on the stomach after meals, pain in the head, dizziness or vertigo, confusion of mind, attended with loss of memory, a gnawing in the stomach when empty, chilliness, affection of sight and hearing, pain and weakness in the back, languor, disturbed sleep, cold feet and hands, tremor, uneasiness in the throat, though pain in the side or breast, &c.

These medicines have been found so effectual in removing the complaints which they are recommended, that physicians frequently having exhausted all their skill, to little or no purpose.

DR. PETERS' ANTI-BILIOUS PILLS.

These pills are composed entirely of vegetable matter, and when taken according to the directions which accompany them, are highly beneficial in the cure and prevention of all bilious complaints. They act especially upon the liver, when in a torpid condition, carrying off a large quantity of bile, through the influence of the excretory function, which is suffered to remain in the system, would produce either Jaundice, Liver Complaint, Bilious Fever, Fates, and Ague, or some other grievous bodily affliction. In all cases of torpor of the bowels, they act like charms.

As an anti-dyspeptic and bilious pill they are invaluable.

Many persons who were subject to violent attacks of sick headache have been perfectly cured in a few weeks by their use.

Those who are subject to that distressing complaint, complain of sea-sickness by taking a portion or two of them a few days previous to embarking on board the vessel, will be almost certain to escape it.

Females can use them at all periods, without incurring any risk.

Persons going to sea or to a southern climate, should take some of these pills with them.

Their virtues will remain unimpaired for years in any climate.

No family should be without these pills, a portion of them, taken occasionally, would be the means of preventing much suffering from sickness.

It is a neglect of keeping up a regular peristaltic action of the stomach and bowels, thus sufficing to be absorbed and mingled with the blood, unassimilated fluids, that most diseases are produced.

Dr. P. feels confident that no person who takes these pills a fair trial, will ever after feel willing to be without them.

They contain no particle of Mercury, or any ingredient that does not sit in harmony with health and oppose disease.

Dr. P. wishes it particularly understood that these pills possess beneficial qualities independent of their purgative effects; they are both tonic and deobstruent, acting upon the secretory and exhalant functions; thus strengthening the patient, while they remove obstructions. Medicines which possess no other, except cathartic qualities, dehydrate the patient, and their repeated use lays the foundation of a long catalogue of Chronic diseases.

They contain no particle of Mercury, or any ingredient that does not sit in harmony with health and oppose disease.

Prepared and sold by Joseph Priestly Peters, M. D. at his institution for the cure of obstinate diseases, by means of vegetable remedies, No. 129 Liberty street, New York, Inventor and sole proprietor. Each box contains 40 pills, price 50 cents.

The above valuable Medicines may be obtained at the Drug Store of YOUNG & M'KAIN.

Camden, May 7, 1836.

## House of Entertainment.

THE Subscriber informs his friends and the public generally, that he has taken the house formerly occupied by Mr. Wm. Royal, as a House of Entertainment and is prepared to accommodate all who may favor him with a call, in the best manner.

Among those lately received and now opening, are the following:

## DR. E. PRATT'S ARTIFICIAL NIPPLE.

THE Subscribers have just purchased a supply of the above instrument, which has been successfully used for the last two or three years for that distressing complaint, sore or excoriated nipples, or where the child's mouth is so sore that it
